WINTER SCHOOL OF RADIOLOGY

Conference Hall "Dimiccoli" Hospital
Barletta (BT) - Italy

29 JANUARY - 2 FEBRUARY 2024

The Winter School Musculoskeletal (MSK) Radiology is an intensive course aimed to promote international exchange of ideas, experience and knowledge about MSK Radiology offering specific skills in the field of imaging. This year the course is organized with the ESSR Sport Subcommittee.

The Course is held in English language and the target audience is composed by 40 to 50 delegates including residents, fellows and clinicians.

The course is organized by Giuseppe Guglielmi, Professor of Radiology at the University of Foggia, Italy.

The course is endorsed by the International Office of University of Foggia, by the European Society of Musculoskeletal Radiology (ESSR) and the Italian Society of Medical and Interventional Radiology (SIRM).

This year a significant space will be also dedicated to the state-of-the-art imaging in the management of sports injuries; in particular injuries and overuse lesions of the axial and appendicular skeleton will be discussed by distinguished and recognized experts in the field of MSK radiology.

In the morning, the faculty members will present their lectures covering most of the musculoskeletal topics, described by plain radiographs, US, CT, MRI, PET-CT, bone scintigraphy.

In the afternoon, the participants will be divided in groups and they will follow their tutors in case presentation section and hands-on on ultrasound. The meeting is not only a didactic opportunity but, thanks to the wide variety of activities designed to the participants, it represents a social moment to share with all participants from all over the world. The Musculoskeletal and Sport Imaging Winter School of Radiology will take place in the Conference Hall of the "Dimiccoli" Hospital of Barletta (BT), in the Puglia region (South of Italy).
